Rejoinder for the news item published in tripurainfo.com

The news item under Caption **“3 doctors quit their jobs in the face of chaos at the start of the second wave of corona”** published in tripurainfo.com on 19th April, 2021 has come to the notice of the Health & FW Department, Govt. of Tripura.

About the alleged resignation of three doctors at Dhalai the factual report is that neither the Director of Health Services nor CMO, Dhalai have received any prayer of resignation from the said doctors. The information published in the website is not correct.

In this regard it is to state that in order to tackle the situation of COVID 19, all sorts of action has been taken on behalf of the Health & FW Deptt. Adequate medical equipments are there. There is no shortage of doctors or nurses and health workers at all. Report of disobeying of circulars and memorandum on COVID-19 is not also a fact.

The Government is reviewing the situation on daily basis and actions are being taken promptly to tackle the situations by following the guidelines. Every effort has been undertaken to step up the quality of patient care services and amenities, with an objective to render best possible services to patients in a demanding situation. The allegation raised in the website is far from truth.

So the Health & FW Deptt. strongly deny the news item published in tripurainfo.com on 19th April, 2021 and it is expected that the corrective facts will be published by the concerned in the same place wherein the news item was published.
