200th successful operation at Atal Bihari Vajpayee Regional Cancer Centre

The 200th cancer operation was reported to be successful at Atal Bihari Vajpayee Regional Cancer Centre in the state. The Cancer Centre has earned its name not only in Northeast but also internationally. A 29-year-old youth hailing from Manu Bazar of Sabroom was suffering from Thyroid Cancer. He admitted himself to Atal Bihari Vajpayee Regional Cancer Centre in Agartala this year for treatment. His tumour was said to be located inside the chest and spread deep down the throat. After getting diagnosed of having Thyroid Cancer, he decided to get operated. Although the operation was very risky, it was performed by Ocosurgeons Dr. Ashish Kumar Gupta and Dr. Pritesh Rajeev Singh, Anaesthesiologists Dr. Mrinal Kanti Debbarma and Dr. Partha Debbarma on December 9. After nine hour long successful operation, the patient was kept in ICU. The patient's condition is said to be stable. After Oco surgeons were recruited from Mumbai and New Delhi and many successful operations, dependency on getting treatment from outside the state has lessened. Patients from abroad were also reported to be taking treatments in the centre. This information was collected from a press release issued by the Director of Health Department.
